50X1-HUM

1. Rains having been insufficient during the spring of 1950, the soil was not tilled at that time in the areas of Korce, Bilisht, Floq and Skrapar. Late crops, however, were fair as a result of September rains, and the harvest of wheat, oats and barley was considered average.
2. In the Kolonje area the harvest was good, with regard to both early and late crops.
3. Due to the lack of rain, the harvest gathered in the Myzeqe area (Central Albania) was poor.
